

Genext, an Integrated Systems, Internet and Media Company.

Our DSL is the fastest with speeds of up to 2 Mbps...that's almost 4 times faster than services offered by other providers!

Genext is committed to delivering a level of service and professionalism that is un-matched by any other local Internet Service Provider.

"I was very impressed, not only with the promptness of service, but their patience and **the quality of their service online.**"

"...deals rarely are as good as they sound.
Genext is as good as it sounds..."

—Tina H.
Satisfied Genext Customer

Tomorrow's Ideas, Today!™

What Does "D S L" Stand For?

DSL stands for Digital Subscriber Line. DSL uses digital modem technology to transform ordinary phone lines (also known as "twisted copper pairs") into high-speed digital lines for ultra-fast Internet access.

DSL also enables access to corporate networks for telecommuters, as well as exciting new interactive multimedia applications such as multiplayer gaming, video on demand and video catalogs.

How Does DSL Work?

DSL modems use a digital coding technique that increases your phone line capacity by nearly 40 times without interfering with your regular phone service.

DSL allows you to simultaneously talk on the phone or send a fax, while surfing the World Wide Web.

What Do I Need To Get Connected?

- DSL Modem (Depends on DSL Service Level)
- Ethernet Network Card (10BaseT) connected to your computer or Local Area Network or an available USB Port.

How Do I Get Started?

It's simple! Go to **www.genext.net** and click **Sign-Up For Internet**. Select your County and then select DSL. Enter your information and in minutes you will have a Service Activation Form, which you will need to sign and return. Upon receipt we will provision your service (typically within two weeks).

You can also contact our offices for account set-up or to speak with our friendly staff about other services like web hosting, wiring, security and networking.
