

Genext, an Integrated Systems, Internet and Media Company.

Tired of waiting for a broadband alternative? Sign up for the fastest connection around....Genext Fiber Optic Internet.

Genext is committed to delivering a level of service and professionalism that is un-matched by any other local Internet Service Provider.

"I was very impressed, not only with the promptness of service, but their patience and the quality of their service online."

"...deals rarely are as good as they sound. Genext is as good as it sounds..."

—Tina H.
Satisfied Genext Customer

Tomorrow's Ideas, Today!™

Home Grown Networks ...

The County Fiber Networks are a high-speed, broadband fiber-optic telecommunications infrastructure originally intended for utility functions. This network will ultimately replace existing communication systems and will allow the Public Utilities to monitor, control, and manage its electric system more effectively.

By connecting directly to the Chelan, Douglas and Grant County PUD Networks, Genext provides homes and businesses with connections to some of the fastest information exchange systems in the country.

Tomorrow's Technology Today...

The communication possibilities are truly revolutionary. Experts in the telecommunications industry believe that fiber-optic networks are capable of "unlimited bandwidth". Through relatively simple upgrades to the core bandwidth and connected devices, the network can incorporate the latest technological advances.

Connecting Multiple Computers...

Each computer will need a network interface card (NIC) to connect to the network. In order to connect to the box outside your home, a certified electrician should professionally install a CAT5e cable.

If you are networking multiple computers, a CAT5e wire should be installed at each computer, back to a central point and then to the box outside your home.

Genext, LLC provides home-wiring and structured cabling through its Integrated Systems Division. For additional information, contact us at 884.7791.

How Do I Get Started?

It's simple! Go to www.genext.net and click **Sign-Up For Internet**. Select your County and then select Fiber. Enter your information and in minutes you will have a Service Activation Form, which you will need to sign and return.

Upon receipt, we will issue a service request with the PUD to determine your eligibility (typically within two weeks).

WE'RE TALKING SCREAMING FAST ...

Get The Details...

Call Genext to learn about services available in your area.

We can issue a connect order right away or just put your name on our list to notify you when service becomes available.

509.884.7791 or 1.866.588.6329

Premise Wiring:

To connect to the Fiber Network, you will need to have a CAT5 wire ran from the PUD Box outside your home to your computer. Your computer will also need a NIC (Network Interface Card).

Genext Systems can provide this service for you at an additional charge. We have licensed electrical contractors who can connect one or more computers to the PUD Fiber Network.

In addition to running phone and network wires, our technicians can assist you in networking multiple computers to one connection, sharing files and printers, as well as assist you with network security.

How Much Does Wiring Cost?

Wiring costs varies by job. Average installation typically runs 1-2 hours, depending on whether you have a NIC. Approximate cost is \$80.00—\$180.00.

Free Consultation:

Genext employs some of the top internet networking experts in the region. When you place a connection order you are entitled to one (1) free hour of consultation to determine your needs and to provide you with a no obligation cost estimate.

- Uninterrupted, high-speed Internet access that's always on
- Service packages to meet every budget
- Reliable, stable fiber optic technology built by experienced Engineers
