Genext, an Integrated Systems, Internet and Media Company.

Tired of waiting for a broadband alternative? Join the largest point-to-multi-point Wireless Internet Network in Washington.

Genext is committed to delivering a level of service and professionalism that is un-matched by any other local Internet Service Provider.

"I was very impressed, not only with the promptness of service, but their patience and the quality of their service online."

"...deals rarely are as good as they sound. Genext is as good as it sounds..."

—Tina H.
Satisfied Genext Customer

Tomorrow's Ideas, Today!™

The Wireless Advantage

There are many advantages to using wireless bridges. Businesses with a number of locations know that installing hard-wired WAN connections to multiple locations is not only expensive but is also time-consuming.

Traditionally, these WAN connections are implemented by purchasing expensive terminal equipment and by leasing T1 or fractional-T1 data links from the telephone company.

A Real World Alternative

Wireless offers a real world alternative. There are no complicated or expensive radio licensing issues—our wireless system operates in license-free radio frequency bands.

Wireless is ideal for areas where installing cable is difficult and cost prohibitive. And once the system is integrated and configured, you will be networked at T-1 speeds, without the additional cost of expensive Telephone Services.

Wireless bridges are an exciting alternative that is both easy to install and affordable to operate.

How Do I Get Started?

It's simple! Go to **www.genext.net** and click **Sign-Up For Internet**. Select your County and then select Wireless. Enter your information and in minutes you will have a Service Activation Form, which you will need to sign and return.

Upon receipt we will schedule an on-site analysis and contact you to provision your service (typically within two weeks).

You can also contact our offices for account set-up or to speak with our friendly staff about some of our other services like web hosting, wiring, security and networking.
