

Digital Service

With Genext TV Digital you receive more choices and crisp clear digital picture and sound. All digital services come complete with an Interactive Program Guide, Quick Launch Guide and Easy Settings Access.

All digital services include help tutorial channels for using your remote and parental controls as well as interactive Poker, Solitaire and 21 or Bust.

Expanded On Other Outlets

When you choose Genext TV Digital you will receive digital services where ever you have a receiver located. You may rent additional receivers for each TV in your house or you may option to receive only Expanded HD Basic on other outlets in your home.

Standard installation includes set-up and connection of 1 digital receiver and Expanded Basic on up to three existing outlets.

We will also program your remote control and provide you with additional operating instructions and resources.

Remote Controls

The AllTouch® Universal Remote Control offers hand-held control of all Genext TV Home Entertainment features including the digital video recorder (DVR), picture-in-picture (PIP) windows as well as interactive TV program guide. (Services sold individually)

It also operates a broad range of digital equipment including other leading-brand TVs, VCRs, CD players, DVDs and audio equipment.

Genext also offers Custom Touch Screens and Remotes, just ask.

Standard Digital Receiver

When choosing your digital services, you may select from Standard or High Definition, as well as Digital Video Recorder options. (See pricing sheet for more information.)

The Standard Digital Receiver includes both RF (coaxial) and Composite (Audio/Video) Outputs. It includes a switched power outlet, as well as convenient sleep timers and easy to use parental controls.

High-Definition Digital Receiver

Experience TV the way it was meant to be. Genext TV offers more HDTV channels than other providers and also broadcasts your local Seattle channels in HD!

The only way to watch HDTV is to connect your HD Television to our HD Receiver. The HD Receiver includes all of the features of our standard receiver plus additional connectivity for HDTV and Digital Audio.

Refer to the 3250 Specification on the reverse side or visit our website for more information.

Digital Video Recorder

Pause, Rewind and Record Live TV. With Genext TV DVR Service you can watch TV on your time schedule. Not only will your pictures be in HD (as broadcasted) but you'll be able to record your favorite shows and play them back whenever you want.

The dual tuner option allows you to watch and/or record two channels at the same time.

Refer to the 8300 Specification on the reverse side or visit our website for more information. DVR is available in Standard and High Definition.

3250 HD Digital Reciever

Analog Component HDTV Outputs

Provides YPbPr outputs for quick and easy connection to most HDTV sets

Dual Audio Outputs with Composite Video Output

Allows simultaneous connection to the audio inputs on the HDTV as well as the audio and video inputs on a VCR

AC-3® Digital Audio and MPEG-1 Audio Support

Supports high quality digital audio standards

Enhanced Graphics Engine

Displays up to 65,000 colors simultaneously and enables high-resolution 640 x 480 graphics – including a scaled video image – in the interactive program guide.

Analog and Digital Service Tuner

Allows both analog and MPEG-2 digital channels to be tuned and displayed

Universal Serial Bus (USB) Interfaces

Optional front panel USB port and standard back panel USB port allow easy interconnection with home consumer devices, such as USB keyboards

BTSC/SAP Decoder

Provides stereo sound on analog channels through the base band left and right outputs

S/PDIF Digital Audio Output

Supports interconnection with surround sound receivers

8300 HD Digital Video Recorder Receiver

160GB Hard Drive

Allows recording and storage of up to 90 hours of SD programming or 20 hours of HD programming

Dual Analog and Digital Service Tuners

Allows both analog and MPEG-2 digital channels to be tuned and displayed and allows two programs to be displayed simultaneously using the PIP function. Allows recording of two live programs while watching a third prerecorded show

Analog Component HDTV Outputs

Provide YPbPr outputs for quick and easy connection to most HDTV sets (10' cables included)

YPbPr and Audio Left/Right Cable Kit

Provides connection from the HD analog component video and audio outputs to the HDTV set

Digital Audio Outputs

Supports digital interconnection with surround sound receivers

HDMI 1.0 Digital Audio/Video Output with HDCP Copy Protection

Provides superior uncompressed digital video and audio quality in a simple, user-friendly connector. HDMI provides the optimal, secure connection to an HDTV set. HDMI is backward compatible with the DVI 1.0 video interfaces using a HDMI-to-DVI converter cable (sold separately)

RF Cable Out

For composite audio/video connection to a VCR or TV

Front Composite Audio/Video Inputs (requires software download)

Supports interconnection to home consumer devices such as VCRs, camcorders or digital cameras for video and audio pass-through to the TV

Genext also provides standard definition set-top receiver for non-HD customers. Standard receivers provide access to digital programming and both RF (Coax) and Composite (Audio/Video) Outputs. * Specifications are subject to change without notice.
